

# Program highlights regarding the AMA's General Medical specialization and Clinical Training in Poland

## Program Summary

It is a 24 months general medical specialization training program in Poland in partnership with some of the top Polish Teaching and non-teaching hospitals and American Medical Academy and its Polish subsidiary AMA Poland z.o.o. and also in cooperation with some of the major Indian hospitals.

The program consists of 11 months of Polish language and medical review subjects and 13 months of clinical training at the approved Polish hospital by the Polish Ministry of Health. After completion of the 13 months clinical training at the Polish hospital/s, successful participants will receive a Polish medical license, after passing the required Polish language exams.

The training program is in English and candidates will be trained under the English-speaking Polish Professors but in order to communicate with the patients, candidates need to know the basic Polish language & Medical terminology. Also, upon completion of the program, a candidate is required to pass the Polish language test (this is not advanced but can be passed with two years of training and living in Poland), for securing the Polish Medical License.

**Special Note:** Upon completion of the 24 months program, including the 13 months of clinical training at the Polish hospitals, candidates are required to take a Polish language test **"B level"** and pass, before receiving the Polish Medical license as a General Practitioner.

*Hence candidates will be trained, and lived in Poland for about 24 months, they should be able to pass the Polish language test without many hurdles. All the candidates can take more than one attempt to pass the language test and can also stay longer in Poland for passing the language test if required.*

# Program highlights regarding the AMA's General Medical specialization and Clinical Training in Poland

## Qualifications:

We are accepting candidates who completed medical degrees from former CIS countries, Indian medical colleges, and accredited medical degrees from all other countries around the world, where candidates complete six years or 5.5 years of medical studies & training for his/her medical degree.

## Program details:

Upon the candidate's qualification is approved, he/she will start six months of Polish language and medical subjects review course and clinical observation at one of AMA's partner Pondicherry hospitals, India.

*[It is also possible to provide this initial training, outside of India for non-Indian & international candidates, as per the need].*

The Polish language will be taught by Polish language experts from Poland (we are bringing Polish language teachers to India or the training faculties for teaching our candidates). After six months of initial training in India outside of AMA faculties, candidates move to Poland to continue with the Polish language training, medical review subjects training, and clinical observation for five more months, before starting the clinical training at the Polish Hospitals.

## Clinical Training:

After these 11 months of training, including intensive Polish language training, candidates will officially start 13 months of clinical training at the approved Polish hospital as per the Polish Ministry of Health guidance & approval. This training will be done at various departments as per the Polish Ministry of Health requirements.

The clinical training will be handled and supervised by the English-speaking Polish training physicians of the Polish hospital. Candidates do a few weeks of rotation at each department, as part of 13 months clinical training, at the teaching/training hospital.

Upon successful completion of the program, candidates will be able to secure a Polish Medical license as a junior doctor with a general practice physician. Further, if a candidate chose to study more to specialize in various fields, it is also welcome to do so.

**Note:** After getting the Polish Medical license, the candidate can work in Poland and/or in any other EU country or any part of the world.

**Tuition fee for this combined program:** Medical review course, Polish language course, and clinical training, combined: US\$24,000 (USD: Twenty-Four Thousand Dollars).

# Program highlights regarding the AMA`s General Medical specialization and Clinical Training in Poland

AMA have multiple hospitals as partners for the clinical training program in Poland and some of them are:

## Nowe Techniki Medyczne Szpital Specjalistyczny im. Świętej Rodziny

The Holy Family Hospital was established in 2007 and is currently one of the largest non-public hospitals in Podkarpacie. The technological and organisational solutions which they use are characteristic of modern medical facilities.

**Departments:** orthopaedics and traumatology of the locomotor system, general surgery, thoracic surgery, neurology with stroke unit, internal medicine, systemic and neurological rehabilitation, anaesthesiology and intensive care unit.

**Number of beds:** 215 beds in total, shared between departments.

## Public hospital in Tarnobrzeg

**Departments:** Clinical Oncology, Anesthesiology and Intensive Care, Pediatric Trauma Surgery, General Surgery, Internal Medicine and Gastroenterology, Cardiology with Intensive Cardiac Care Unit, Neurology with Stroke Subdivision, Neonatal, Premature Infants and Neonatal Pathology, Ophthalmology, Orthopaedics and Traumatology of the Musculoskeletal System, Otolaryngology Ward with Sub-Department of Maxillofacial Surgery, Pediatric, Obstetrics, Gynecology and Pregnancy, Pathology, Rheumatology, Hospital Emergency.
